

AUDACITY (DOWNLOAD AND RECORD)

You have to record your sound file first. If you do not have recording software Audacity is a free program. Go to <http://audacity.sourceforge.net/> then click on the download for what versions of windows you are using (XP, Vista or Win 7). If you are a Mac user Audacity has just released 1.3.11 Beta which works for Windows and Mac. The Beta is good for Windows 7.

1. Click on "Download"
2. Click on "Audacity 1.3.11 installer" (or whatever version of windows you are using)
3. Click on "Save"
4. Depending on where you want your download to go you may click on Desktop or just simply click "Save" but make sure you know where it is downloading so you can find it to execute the program.
5. Find the Audacity 1.3.11 installer and double click on it to install.
6. Follow the prompts to install
7. Open Audacity
8. Click on record to record
9. Click on File, export as Wave or mp3
10. Name (remember where you are saving it)
